GitHub Pages Deployment Instructions

📦 Package Contents

This package contains the complete Joni Woods website configured for GitHub Pages deployment.

Files Included:

- **Complete source code** with Next.js configuration
- **Static build files** in `app/out/` directory (ready for deployment)
- **GitHub Actions workflow** for automatic deployment
- **Configuration files** for GitHub Pages

🚀 Deployment Options

Option 1: Automatic Deployment (Recommended)

1. **Create a new GitHub repository** named `joniwoods-transformation`
2. **Upload all files** from this package to your repository
3. **Enable GitHub Pages**:
   - Go to repository Settings → Pages
   - Set Source to "GitHub Actions"
   - The workflow will automatically deploy on push to main branch

Option 2: Manual Static Deployment

1. **Create a new GitHub repository**
2. **Upload only the contents** of the `app/out/` directory
3. **Enable GitHub Pages**:
   - Go to repository Settings → Pages
   - Set Source to "Deploy from a branch"
   - Select "main" branch and "/ (root)" folder

🔧 Repository Setup Steps

1. **Create Repository**:
   ```bash
   # Create new repo on GitHub, then:
   git init
   git add .
   git commit -m "Initial commit: Joni Woods website"
   git branch -M main
   git remote add origin https://github.com/YOUR_USERNAME/joniwoods-transformation.git
   git push -u origin main
   ```

2. **Configure GitHub Pages**:
   - Repository Settings → Pages
   - Source: "GitHub Actions" (for automatic deployment)
   - The site will be available at: `https://YOUR_USERNAME.github.io/joniwoods-transformation`

📋 Pre-deployment Checklist

- [x] Static export build successful
- [x] `.nojekyll` file added (prevents Jekyll processing)
- [x] Images optimized and paths configured
- [x] GitHub Actions workflow configured
- [x] All external links tested
- [x] Mobile responsiveness verified

🌐 Live Website Features

The deployed site includes:
- **Hero Section** with transformation programs
- **About Section** with professional highlights under author photo
- **Media Appearances** with image galleries
- **Book Information** and purchase links
- **Testimonials** from clients
- **Contact Form** (Note: Form submissions will need backend integration)
- **Blog Articles** with real content from Journey Life Coaching
- **Responsive Design** for all devices

🔄 Making Updates

After initial deployment, you can:

1. **Make changes** to the source code
2. **Push to main branch**
3. **Automatic rebuild** via GitHub Actions
4. **Live site updates** within minutes

📞 Support

- **GitHub Pages Documentation**: https://docs.github.com/en/pages
- **Next.js Static Export**: https://nextjs.org/docs/app/building-your-application/deploying/static-exports
- **Custom Domain Setup**: Available in GitHub Pages settings

🎯 Performance Notes

- Site is optimized for fast loading
- All images are compressed and optimized
- Static files are cached by GitHub's CDN
- Mobile-first responsive design
- SEO-optimized with proper meta tags
